Alerting Abstract ...calculating disability exposure is provided in database of probabilities of disability, by applying model medical insurance claim codes of group of individuals.

Claims:

...morbidity categories for the medical insurance claims of each of the members of the first model population; processing the disability insurance claim database for each member of the second model population with the morbidity category classification routine to obtain a database of morbidity categories for the disability insurance claims of each of members of the second model population; providing the computer a prevalence rate calculation routine; processing the database of morbidity categories for the medical insurance claims of each of members of the first model population and the number of members eligible to make medical insurance claims, with the prevalence rate calculation routine to obtain a database of prevalence rates of...

...the computer a proportion calculation routine; processing the database of morbidity categories for the disability insurance claims of each of members of the second model population with the proportion calculation routine...

...the database of prevalence rates of each morbidity category within the members of the first model population, the database of values for the proportion of the second model population that each morbidity category is...

...model that can estimate disability exposure arising from insuring a group of individuals to be underwritten for a coverage period by applying the model medical insurance claim codes of the members of the group of individuals.

XRFX Acc No: N2001-257493

Organization policy services management system for remote private network,
has central policy server which is configured to define policy settings and
manage network's policy enforcers from single location

Patent Assignee: ALCATEL (COGE); ALCATEL INTERNETWORKING INC (COGE);
ALCATEL NV (COGE); HUNT W (HUNT-I); IYER M (IYER-I); IYER S V
(IYER-I); KALE R P (KALE-I)

Inventor: APSANI L; HUNT W; IYER M; IYER S V; JAIN H K; JAIN S; KALE R P;
MALVIYA P; SHAH R; SHANUMGAM U; EYER M; EYER S V; KARL R P

Detailed Description

... with respect to changes in the data format. The method involves

communicating with the data carrier via a wireless interface using a data carrier query protocol; communicating with a database application via a database interface using a database query protocol; reading a mapping definition; exchanging data between the wireless interface and the database interface by mapping between the data carrier query protocol and the database query protocol within the mapping interface using the mapping definition; and storing the mapping definition separately from the mapping interface...

Method and apparatus for providing structured data for free text messages

Patent Assignee (name, country): THINK SOFTWARE PTY LTD, AU

Patent Publications:

Patent Number Kind Date Appic Number Kind Date

Main Patent:

CN 101283350 A 20081008 CN 200680034066 A 20060717

PCT Patent:

WO 2007009168 A1 20070125 WO 2006AU1004 A 20060717

Priority:

US 20054105 P 20050715

Record Type (Availability): ABSTRACT SPECIFICATION CLAIMS IMAGE

International Patent Classification:

IPC Level Scope Position Status Version Date Action Date Source Office

International Patent Classification (Version 8):

G06F-0017/22...

...G06F-0017/27

Detailed Description:

...image the invention claims realizing picture 1 the method embodiment an exemplary information system. Image element the invention claims realizing method of picture 1 of the embodiment of the another exemplary information system. 2c...The invention also provides advantages such as bearing the computer can read instruction of the carrier in the form of software product and using these methods and software product system of...

... of process "states," each with associated business rules and events. A
business rule can enforce policy, such as reject orders from
delinquent customers, or implement and publish notifications for events such...

... Modular Rule Processing: Agiliti's business rules
transparently map disparate application formats and semantics for
easy automation across systems. Agiliti also allows business analysts to
define collections of rules as business policies. Rule inheritance
allows policies to be enforced globally, yet customized and extended
to support policy subtleties of different divisions or geographic regions.

Event-Driven Distributed Integration: Business Agiliti builds on...

... Party Integration: Business Agiliti leverages open Internet and object
standards to extend and integrate applications, databases and message
queuing systems for realtime execution. Standards support includes
CORBA/IIOP, Java, DCOM and IP multicast. Vitria Connectors enable
integration with packaged applications, databases and platform
products from IBM, Informix, Microsoft, Oracle, SAP and others; An Open
Connector Toolkit...
